Can you find me a brand with a strong environmental commitment and no animal testing?

Based on the information provided, **Garnier** is an excellent choice as they align with your preferences of having no animal testing and a strong environmental commitment. Here's why:

Garnier:

- No Animal Testing:** All Garnier products are Leaping Bunny-certified cruelty-free.
- Environmental Commitment:**
  - Garnier has above-average sustainability performance, scoring higher than 91% of peers.
  - Partnerships with NGOs like Plastics For Change and Ocean Conservancy to combat plastic pollution.
  - Supports U.S. conservation projects through collaborations with the National Park Foundation.
  - 99% of ingredients are vegan, and 82% biodegradability is achieved in formulas as of 2022.

Garnier stands out for its strong environmental efforts and cruelty-free practices, making it a great brand to consider.

Does Garnier use recyclable or refillable packaging?

Garnier does use recyclable packaging as part of their sustainability efforts. Here's a breakdown based on the information provided:

- Recyclable Packaging:** Garnier is committed to using recycled materials in their packaging. As of 2022, 56% of the plastic used was recycled, which helped avoid 3,133 tons of virgin plastic.
- Refillable Packaging:** There is no explicit mention of Garnier offering refillable packaging in the information provided. However, they are exploring innovative ways to reduce packaging waste, such as shampoo bars that reduce packaging by 80%.
- Future Goals:** Garnier aims for all plastic used in their packaging to be recycled or bio-sourced by 2025. This indicates a strong commitment to increasing the use of recyclable materials.

Overall, Garnier is focused on reducing its environmental impact through sustainable practices, including the use of recyclable packaging and innovative product designs.

How transparent are they about their supply chain?

Garnier demonstrates a strong commitment to transparency across various aspects of their operations, particularly in sustainability and ethical practices. Here's a breakdown of their level of transparency:

Areas of Transparency:

- Product Impact Labeling System:** Garnier uses a system verified by Bureau Veritas to evaluate products on 14 environmental factors, providing clear scores from A (best) to E. This allows consumers to make informed choices, showcasing transparency in product environmental impact.
- Partnerships and Collaborations:** They collaborate with NGOs like Plastics For Change and Ocean Conservancy, indicating transparent efforts to address plastic pollution and support conservation projects.
- Ethical Sourcing Practices:** Garnier's Solidarity Sourcing program supports fair trade and biodiversity preservation, such as their Aloe Vera partnership in Mexico. This reflects transparency in ethical sourcing and community support.
- Cruelty-Free and Vegan Commitment:** As a Leaping Bunny-certified brand, Garnier is cruelty-free, with 99% vegan ingredients and 82% biodegradable formulas. This transparency assures consumers of their ethical standards.

Areas for Improvement:

- Scope 3 Emissions Disclosure:** While Garnier reports Scope 1 and 2 emissions, there's a lack of detailed information on Scope 3 emissions (indirect supply chain impacts). Addressing this gap could enhance overall supply chain transparency.

In summary, Garnier is transparent in many areas but has opportunities to further disclose details regarding indirect environmental impacts within their supply chain.
