Recommend me a full skincare routine from a European brand that doesn't test on animals.

Skincare Routine Recommendation:

Based on your preferences for an animal-testing-free European brand, **Bielenda Professional** is highly recommended due to its stringent certifications and transparency. Here's a suggested full skincare routine using their products:

- 1. **Cleanser:** Bielenda Professional Cleansing Milk - Gentle and effective for all skin types.
- 2. **Toner/Serum:** Bielenda Professional Hyaluronic Acid Serum - Provides intense hydration and enhances skin elasticity.
- 3. **Moisturizer:** Bielenda Professional Niacinamide Moisturizing Cream - Rich in niacinamide to improve skin texture and reduce redness.
- 4. **Eye Cream:** Bielenda Professional Eye Cream with Q10 and Hyaluronic Acid - Targets dark circles, puffiness, and fine lines around the eyes.
- 5. **Sunscreen:** Bielenda Professional UV Defense SPF 30 - Broad-spectrum protection against harmful UVA/UVB rays.

Alternative Option: If you prefer a different brand or if Bielenda's products don't meet your specific needs, consider **Revolution Skincare**, based in the UK. While they are cruelty-free, be aware of their limited transparency on labor and environmental practices.

This routine is designed to provide comprehensive skincare that aligns with your values and preferences, ensuring a clear conscience and effective care for your skin.
